DETAILED ACTION

Response to Amendment

The preliminary amendment filed 08-09-2006 has been entered. Claims 1-20 are pending.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the articles and staining medium (claims 1 and 2) and the means to pressurize (claim 20) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

On page 4, lines 21-23, the incorporation of essential material in the specification by reference to foreign patents is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

The abstract of the disclosure is objected to because of its usage of the term "means". Correction is required. See MPEP § 608.01(b).

Claim Objections

Claim 2 is objected to because of the following informalities:

Claim 2, line 11, change "can be" to --is--;

Claim 7, line 2, after "wherein" insert --said at least one path includes--;

Claim 7, line 3, delete "are";

Claim 18, line 5, delete "(Fig. 2)"

Claim 20, line 1, delete "combination of a"; and

Claim 20, line 3, change "and" to --, wherein--, delete "that", and before "staining" insert --the--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 8, 9, and 13-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear if the intermittent seam line recited in claims 8 and 9 is referencing the partitioning means previously recited in claim 2.

It is unclear if the intermittent seam line recited in claims 18 and 19 is referencing the partitioning means previously recited in claim 2.

In claims 13-15, line 2, and claim 17, line 5, "the openings" lacks antecedent basis.

It is unclear if the spaced openings recited in claim 16 are referencing the openings previously recited in claim 13.

In claim 17, line 7, "the slit" lacks antecedent basis.

In claim 17, line 8, "the plastics material" lacks antecedent basis.

Allowable Subject Matter

Claims 1-7, 10-12, and 20 are allowed.

Claims 8-9 and 13-19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

It is noted claim 2 has been examined with the position that the staining medium is being claimed.

Conclusion

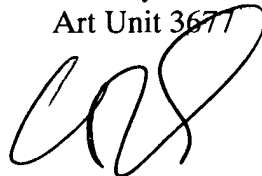

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
